

PERSONAL PROTECTIVE FACE MASK

Quality single use mask designed for protection and comfort. This protective face mask is ideal for a wide range of applications and wherever fluid exposure is possible.

CONSTRUCTION

3-ply mask core material consists of inner and outer layer of non-woven fabric, along with melt blown non-woven for the middle layer. Bacterial filtration efficiency > 95%.

WEAR

Mask is secured to the face by way of cushioned, soft, non-irritating ear loops with elastic properties, allowing for ease of application and removal.

FIT

Fit is accomplished via an embedded malleable metal flat strip along the nose-bridge. Proper contouring ensures improved mask effectiveness.

Intended Use:

Personal facial protection. Single use.

Size:

170mm x 100 mm
One size fits all
